

ID:	UC - 13
Title:	Receive Purchase Orders
Description:	Supplier receives purchase orders from the restaurant and processes them.
Primary Actor:	Supplier
Secondary Actor:	RMS, Manager
Preconditions:	Purchase order must be sent.
Postconditions:	Order is processed and scheduled for delivery.
Generalization:	Receive Purchase Orders is a specialized case of supplier operations.
Dependencies:	Requires generated purchase orders from the manager.
Main Success Scenario:	1. Supplier logs into RMS. 2. View incoming purchase orders. 3. Confirm and process the order. 4. Notify the restaurant about dispatch.
Extensions or Alternate Flow:	If stock is unavailable, the supplier notifies the restaurant.
Frequency of Use:	Weekly.
Status:	In Development
Priority:	Medium
