

ID:	UC-06
Title:	Make Payment
Description:	The customer pays for the order placed using available payment options. The system processes the transaction and generates a receipt.
Primary Actor:	Customer
Secondary Actor:	Payment Gateway, RMS
Preconditions:	The order must be placed and confirmed.
Postconditions:	Payment is processed, and a receipt is generated.
Dependency:	Included in "Place Order"
Generalization:	Special case of "Process Payments" (UC-04)
Main Success Scenario:	1. Customer selects a payment method. 2. Customer enters payment details. 3. The system processes the payment. 4. Upon success, the order is marked as paid. 5. The system generates a payment receipt.
Extensions or Alternate Flow:	2a. If payment fails, the customer is asked to retry or choose another payment method.
Frequency of Use:	Every time an order is placed.
Status:	Under Development
Owner:	Project Team
Priority:	High
